

BEST PRACTICE-1

TITLE- STUDENT REINFORCEMENT BY UPGRADATION OF LEARNING METHODS IN ANATOMY BY MAKING 3D MODELS/CHARTS AND SEMINARS BY FIRST YEAR STUDENTS .

OBJECTIVE OF THE PRACTICE:

1. Promoting and supporting our students to upgrade their learning abilities.
2. Encouraging students achievements.

As a method of innovative teaching and learning in order to maximize student's understanding of anatomy by involving them in making **Anatomical 3D models/charts , presentations and seminars by first year students .**

CONTEXT:

Our students are very efficient, dedicated and perform multitasking for encompassing learning from various teaching methodology. Upgradation of traditional learning methods of students is an essential component. In addition, students' learning outcomes are exhibited and awarded.

PRACTICE:

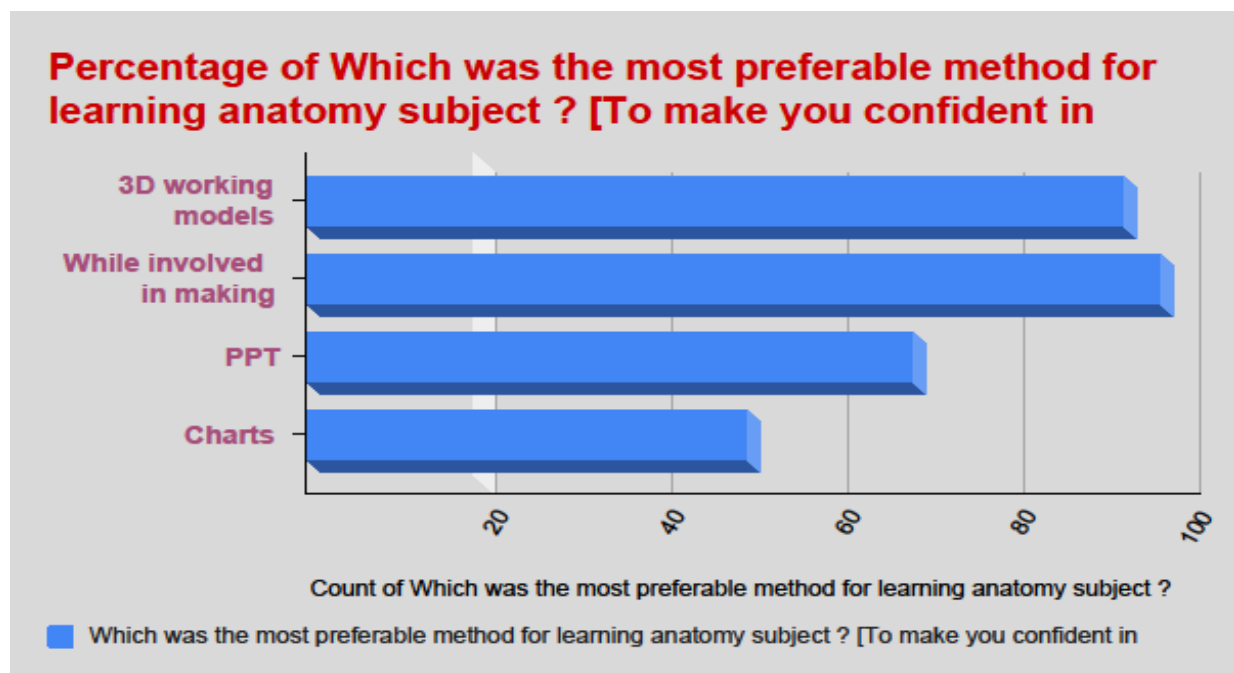

- 1. Promoting and supporting our students to upgrade their learning abilities.**
 - 125 students take admission in First BDS every year. Of them, we divide the students into batches of 6-10.
 - Each batch is allotted a topic on which they have to make 3D working models and also prepare a powerpoint presentation which is to be presented in front of all the faculties and the students.
 - Scheduled time is given for the presentation and submission of their project work for exhibition.
- 2. Encouraging students' achievements.**
 - Annual exhibition cum competition is held in the department.
 - All students have to present their 3D MODELS and All the faculty members across the entire institution are invited for the exhibition
 - Performance feedback is collected of the students from the faculty during the exhibition.

EVIDENCE OF SUCCESS:

- A Google form feedback is being taken from past 3 years asking which is the most preferred method of learning anatomy- 3D working models or the routine PPT presentations.
- As per the pie charts given below, 71.5% students preferred 3D working models as a preferable method of learning to clear concepts of anatomy.

- Also shown below is a Bar graph, which depicts that the process of getting involved in the making of PowerPoint Presentations made them confident in the subject.
- As a result, there is an Increase in the number of students participating actively during model making and preparing PPT for seminars every year.
- Also, there is Decreased fear of interaction between student-student and student- faculty.

<u>BATCH</u>	<u>TOTAL NO.OF STUDENTS</u>	<u>TOTAL NO. STUDENTS GIVEN RESPONSE</u>
2018-19	100	84
2019-20	125	107
2020-21	125	113

Count of Which was the most preferable method for learning anatomy subject ? [To obtain sufficient knowledge of anatomy]

Count of Which was the most preferable method for learning anatomy subject ? [To clear 3D concepts of anatomy]

2019-20 batch (Pandemic batch)

- During the Covid 19 Pandemic, the students were instructed to submit their projects through videos.

PROBLEMS ENCOUNTERED AND RESOURCES REQUIRED

1. Students from different backgrounds, religions and states take admission in our institute. Usually in the First Year, a Lack of communication has been observed among them. Our model making and seminar Presentation projects help the students to overcome this communication gap and build the basis of life long friendships.
2. Many students had stage fear and difficulty in presenting the seminar which was also overcome by doing multiple rehearsals during practical hours.

BEST PRACTICES-2

TITLE: CLINICAL SKILL UPLIFTMENT PROGRAMS

1. The Comprehensive clinic within the institute
2. Peripheral posting of Interns as a part of their curriculum

OBJECTIVE:

To bring out the best clinical abilities of the students and to practically apply their academic knowledge acquired in the BDS course

To be able to independently manage and execute good clinical dental practice

CONTEXT:

To be able to receive a first-hand experience of complete diagnosis and devise comprehensive treatment plan involving multiple dental specialties and execute the same independently.

THE PRACTICE:

1. Comprehensive clinic

- In academic institute, every patient requiring multiple dental treatment is referred to various respective department for the same. Hence the students posted in one particular department receives the patient with an established diagnosis and preplanned treatment without getting a first-hand experience of patient's multiple dental problems.
- To overcome this limitation of an academic institute, GDCHA has come up with a comprehensive clinic set up, where in a student gets first-hand experience of patients' all dental problems, devises a treatment plan and executes treatment requiring expertise from all specialties of dentistry, thus mimicking a student's experience of private dental practice.
- 2 interns posted in the oral pathology department are posted in the comprehensive clinic on a weekly basis

2. Peripheral posting of intern students

- Intern students are given compulsory 2 month posting in and nearby peripheral areas in govt. medical colleges/hospitals having dental department. They can opt amongst the various rural areas for their posting and serve the rural masses.

- Thereby, they get an opportunity to understand the prevalence of dental diseases in rural population and treating them at a dental set up in a government medical college or hospital.
- In addition to establishing a virtue of social service, this even boosts their confidence of working independently.

EVIDENCE OF SUCCESS:

1. Comprehensive clinic

No. of patients treated in Comprehensive clinic by interns													
YEAR	MONTH												
	JAN	FEB	MAR	APR	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC	TOTAL
2019	20	48	60	58	56	49	54	52	60	60	60	37	614
2020	127	-	-	9	2	38	53	42	51	51	25	40	438
2021	51	50	45	60	46	34	50	60	52	59	51	60	618
2022	86	61	29	30									206(till APRIL)

- As it is evident from the above statistical data, interns have been treating the patients regularly at the comprehensive clinic performing procedures related to all branches of dentistry, boosting their confidence for handling future general dental practice

2. Peripheral posting of intern students

(Photos of the rotation of the students)

All these peripheral postings have been an added advantage to the rural patients and also enriching the clinical skills of the interns.

PROBLEMS ENCOUNTERED

1. A special permission was needed to be able to set up the comprehensive clinic.
2. Procurement of all the equipments and regular indentation of all the materials
3. Sanctioning of the funds for the same

4. Added responsibility on the assigned faculties to run the Comprehensive clinic smoothly.

5. Maintenance of registers and record of patients treated.
