LIFE IN GDCHA

- Everyone's college life is like a roller coaster which has its own ups and downs. I have spent 4 years of my life here in this college and it has taught me how to independent , organized and being better at decision making not only with the patient's but also in life.
- All those sleepless night's during our examinations were worth it because it taught me how to persevere for the thing that you want in life.
- This college has provided me with the exposure that i required in life. I'll always cherish my journey in Government Dental College and Hospital , Ahmedabad.

SHIVANI KATARIA
(Intern)

- I am currently working as an intern at our hospital. Studying in Government Dental College has been truly a wonderful and exciting experience, where I not only learned dentistry but also acquired some crucial life lessons from teachers and peers evenly.
- I have gone through a lot of bumps during the first few years, but I've also enjoyed the ride in between. This has been an amazing ride, no matter the struggles I have faced.
- Living in hostel has also been a whole other experience. It's where your friends become your family, quite so. I think I will be missing this the most when I leave the college.
- Indeed, Government Dental College and Hospital has given me the best memories to cherish.
